

# Power connected student and staff experiences

Your school deserves the smartest iPaaS solution for higher education.

Our cloud-based iPaaS **modernizes** legacy systems and applications, **maximizes** integration flexibility, **accelerates** processes, and **untangles** local integrations that hamper efficiency.

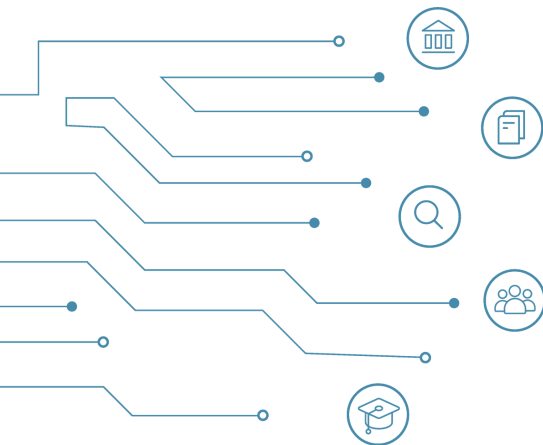

Unlike other iPaaS options, **we handle unique needs of colleges and universities.**

**Integrate** faster and easier...with less ongoing reliance on IT staff.

**Implement** without adapting *your* current process. We fit you, not the other way around.

**Optimize** existing higher education platforms to meet diverse student experience expectations.

**Operate** efficiently with a simple, transparent and highly competitive licensing structure.

***“Constituo is the total package of functionality and service.”***

*AVP, Data, Operations and Technology  
Thomas Jefferson University*

Cloud-based solutions on **YOUR** terms – with **security, scalability** and **redundancy**.

## Be Confident

Nobody moves data across the ecosystem better than Constituo. We know the opportunities and relieve the pain points of integrating every major system serving higher education, including SIS, ERP, and CRM.

## Move Faster

Campus departments move faster and independently with no-code data mapping tools. IT teams deliver quicker and more efficiently, with less complexity and reduced technical liability.

## Stay Supported

Our customers are never on their own, knowing they can count on us to address new on-going integration pain points.
